**Subject:** Commercial Waste Treatment and Disposal Facilities  
**Date:** Thursday, August 28, 2014 2:09:01 AM

---

**Hello:**

**I got your name from Nicole Bealle from the TCEQ Houston Office. TCEQ and EPA are working on the CES Environmental Services Site in Houston and will need to dispose of wastes left behind after the facility closed operations. The types of waste may include: Liquids, Sludges, Contaminated Stormwater that may be hazardous or non-hazardous wastes. We are in the process of doing analytical to make that determination.**

**I need to find out a list of available disposal facilities in the Houston Area primarily but could be expanded to the east to Port Arthur/Beaumont and to the west to Corpus Christi and to the north to Dallas.**

**I was thinking:**

- 1. Industrial Wastewater Treatment**
- 2. Fuel Blending**
- 3. Incineration**
- 4. Thermal Desorption**
- 5. Neutralization**
- 6. Used Oil Recycling**
- 7. Empty Container Cleaning and Disposal**

**If you have a complete list of Commercial Waste Treatment and Disposal Facilities in the State of Texas, that would be wonderful.**

**Anything you can do to help will help me start narrowing down potential Treatment and Disposal Facilities in the area that we can have bid on the wastes that we may have.**

**Thanks for your prompt attention to this request,**

**Gary Moore**

**Federal On-Scene Coordinator**

**U.S. EPA Region 6**
